

The market for animal models is estimated to exceed \$2,677 million with a healthy CAGR of 6.1% over the period 2021-2030

Asia-Pacific is expected to experience growth at the highest rate, registering a CAGR of 7.3% during the forecast period.

NE WIN SIVERS DRIVE, PROVINCE: - PORTLAND, UNITED STATES, November 23, 2021 /EINPresswire.com/ --

According to the report by Allied Market Research, titled, "[Animal Model Market](#)" by Animal Type (Rat, Mice, Guinea Pigs, Rabbits, and Others), Application (Drug Discovery & Development, Basic Research, and Others), and End User (Pharma & Biotech Companies, Academic Research Institutes, and Others): Global Opportunity Analysis and Industry Forecast, 2021–2030". The report provides a detailed analysis of changing market dynamics, top segments, value chain, key investment pockets, regional scenario, and competitive landscape.

Animal Model Market

“

Animal Model Market by Animal Type (Rat, Mice, Guinea Pigs, Rabbits, and Others), Application (Drug Discovery & Development, Basic Research, and Others), and End User (Pharma & Biotech Companies)”

Allied Market Research

Increase in usage of animal models in virology and infectious diseases, rise in adoption of CRISPR technology, and upsurge in likelihood of epidemic or pandemic outbreaks fuel the growth of the global animal model market. On the other hand, regulations and laws for ethical use of animals in research impede the growth to some extent. However, several growth opportunities in the emerging markets have proved to be beneficial for the market.

Animal models refer to those animals on which pathological and biological experiments are performed & tested. Animal models are utilized as animals and human beings share important physiological & organic structures. In addition, some of the animal species share nearly similar genetic structure to humans. Thus, animal models are utilized by scientists and researchers to study & find a cure for diseases, test the final medicinal drugs before it is used on humans, and also to develop new products. New drugs are examined in animals for safety & efficacy before they are examined in humans.

Charles River Laboratories International, Inc, Envigo, Eurofins Scientific SE, GenOway S.A., Hera BioLabs (Transposagen Biopharmaceuticals), JSR Corporation (Crown Bioscience Inc.), Ozgene Pty Ltd., PerkinElmer, Inc. (Horizon Discovery Group plc.), Taconic Biosciences, and The Jackson Laboratory.

□□□□□-□□ □□□□□□□□□:

- 1) The Covid-19 pandemic and followed by lockdown has affected several manufacturing industries.
- 2) The prolonged lockdown resulted in a disrupted supply chain and increased the prices of raw materials.
- 3) However, as the world has been recovering from the pandemic, the market is estimated to get back on track.

□The study provides an in-depth analysis of the Animal Model Market along with the current trends and future estimations to elucidate the imminent investment pockets.

□It offers Animal Model Market analysis from 2020 to 2030, which is expected to enable the stakeholders to capitalize on the prevailing opportunities in the market.

□A comprehensive analysis of four regions is provided to determine the prevailing opportunities.

□The profiles and growth strategies of the key players are thoroughly analyzed to understand the competitive outlook of the global Animal Model Market growth.

CHAPTER 1: INTRODUCTION

1.1. Report description

1.2. Key benefits for stakeholders

1.3. Key market segments

1.3.1. List of key players profiled in the report

1.4. Research methodology

1.4.1. Secondary research

1.4.2. Primary research

1.4.3. Analyst tools and models

CHAPTER 2: EXECUTIVE SUMMARY

2.1. Key findings of the study

2.2. CXO perspective

CHAPTER 3: MARKET LANDSCAPE

3.1. Market definition and scope

3.2. Key findings

3.2.1. Top investment pockets

3.2.2. Top winning strategies

3.3. Porter's five force analysis

3.4. Top player positioning, 2020

3.5. Market dynamics

3.5.1. Drivers

3.5.1.1. Rise in usage of animal models in virology and infectious diseases

3.5.1.2. Increase in adoption of CRISPR technology

3.5.1.3. Upsurge in likelihood of epidemic or pandemic outbreaks
