

Multiple Benefits Of Microbiome-Based Skin Products Is Driving The Microbiome Industry

*The Business Research Company's
Microbiome Market 2021 - Opportunities
And Strategies – Global Forecast To 2030*

LONDON, GREATER LONDON, UK,
November 23, 2021 /

EINPresswire.com/ -- The usage of microbiome-based skin products is a driver for the [microbiome market](#). The

increased environmental stressors, pollution, and fear of chemicals, is driving consumers towards

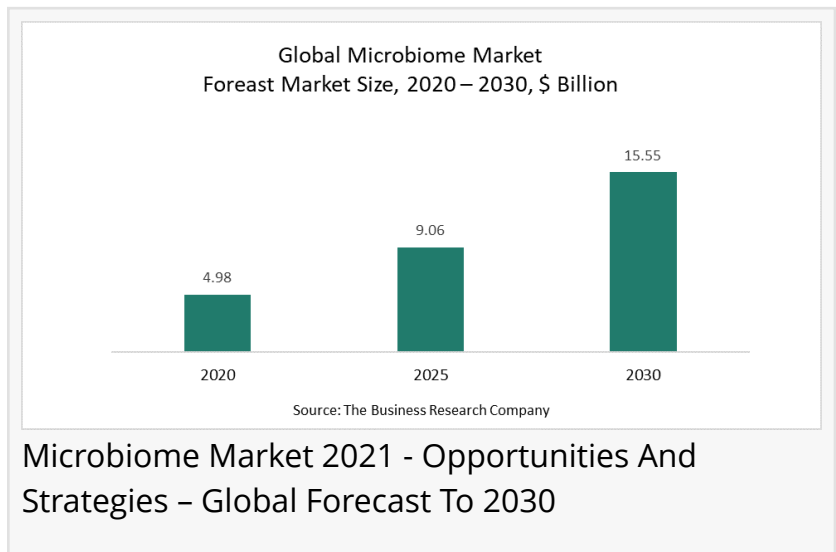

microbiome-based skincare. The

skincare market has embraced distinct approaches, targeting the skin microbiome such as probiotics, prebiotics, postbiotics. These products help in anti-aging of skin by improving the quality of skin, accelerating its renewal process, and supporting the shedding of dead skin cells. Microbiome-based cosmetics can also help prevent dandruff, acne, psoriasis, or atopic dermatitis. The multiple benefits of microbiome based cosmetic products is promoting the use of these products.

The global microbiome market size reached a value of nearly \$4.98 billion in 2020, having increasing at a compound annual growth rate (CAGR) of 12.6% since 2015. The market is expected to grow at a CAGR of 12.7% from 2020 to reach \$9.06 billion in 2025. The market is expected to reach \$15.55 billion in 2030, at a CAGR of 11.4%.

TBRC's holiday sale has begun with discounts on ALL market research reports! [Grab your deal now](#).

Companies in the microbiome market are strategically partnering and collaborating with other companies to broaden their product portfolios and expand their microbiome therapeutics business. For instance, in November 2019, Enterome, a France-based leading player in the microbiome market entered into collaboration with Memorial Sloan Kettering Cancer Center (MSK), a US-based research institute to develop cancer immunotherapies from gut microbiome-derived antigens. Also, in 2018, Microbiotica, a leading player in the market entered into a

collaboration with Genentech to develop microbiome therapeutics to treat inflammatory bowel disease.
