Surge in product availability and rise in electrosurgical procedures have fueled the growth of the global smoke evacuation system market. However, dearth of skilled professionals and technical concerns hamper the market growth. On the other hand, surge in patient preference for minimally invasive surgeries would open new opportunities in the coming years.

Covid-19 scenario:

The pandemic led to lockdown and strict implementation of social distancing norms. This created a supply-demand gap.

Moreover, various elective procedures such as aesthetic treatments were delayed due to stringent regulations imposed on clinics and hospitals.

However, some studies observed that the Covid-19 virus can remain in the aerosol for up to three hours, which fueled the need for smoke evacuation systems to minimize transmission.

Comprehensive competitive analysis and profiles of major market players, such as

Medtronic, Plc

Conmed Corporation  
Ethicon  
Stryker Corporation  
Ecolab  
Pall Corporation  
Coopersurgical, Inc.  
Zimmer Biomet Holdings Inc.  
Olympus corporation  
Utah Medical Products, Inc.
