Major Key players in this Market:

EPAM Systems, Mindtree, HCL Technologies, ATOS, Tech Mahindra, Hexaware, Tricentis, Cigniti, Larsen & Toubro Infotech, and NIIT Technologies.

Segmental Analysis

Product and application segments have been included in the study. All of the items on the Continuous Testing market today have been recorded by the researchers. They've also cast light on significant players' new product releases and advancements. The researchers supplied

revenue prediction numbers for the period 2021-2027 in the segmental study, depending on type and application. They also talked about each segment's growth rate and potential from 2021 to 2027.

Regional Analysis

North America, Europe, Asia Pacific, Central and South America, as well as the Middle East and Africa, are among the major regions investigated in the research report. The experts in this section of the research have looked into a number of sectors that are contributing to the development and could provide manufacturers with profitable growth opportunities in the coming years. The research also includes sales and revenue forecast data for the years 2021-2027 by area and country.

Key Trends and Analysis of the Global Continuous Testing Market:

Continuous testing market in Asia Pacific is expected to exhibit the highest CAGR over the forecast period (2018 - 2026). Continuous testing market in this region is projected to reach US\$ 733.3 million by 2026. The growth in this region is attributed to increasing development in IT infrastructure in emerging economies such as India and China among others. Increasing adoption of mobile devices and Internet by consumers are factors expected to escalate the overall market growth. According to ' analysis, it is estimated that around 3.5 billion internet users were reported globally in 2016, and around 45% of the global population accessed the internet in the same year. According to ' analysis, majority of the global internet users were located in Asia Pacific, whereas China is the leading country in digital marketing in the world. In 2016, China recorded over 721 million internet users. Therefore, these factors are expected to boost demand for continuous software delivery, which consequently will accelerate demand for continuous testing, in order to continuously review and optimize the test suite to eliminate redundancy and maximize business risk coverage.

Key players in the market are focusing on product launches, in order to enhance its product offerings. In July 2016, LogiGear, a software testing solution company, launched Continuous Testing (CT) solution and service to enable improvements in automated testing in DevOps environments. LogiGear's continuous testing solution and its full-range of testing automation services will help customers with the transformation from manual to continuous testing methods.

Major players operating in the global continuous testing market include EPAM Systems, Mindtree, HCL Technologies, ATOS, Tech Mahindra, Hexaware, Tricentis, Cigniti, Larsen & Toubro Infotech, and NIIT Technologies.
