COVID-19 Scenario Analysis:

Upsurge in demand for online classes

The outbreak of COVID-19 has led to the shutdown of educational institutions and as such the conventional classrooms are replaced with digital medium of imparting education. This has increased the demand for online platforms to provide students with the digital access to learning.

Availability of choice of courses

The key market players are now offering a wide range of compulsory as well as optional, chargeable as well as free courses so that no customer is left out.

Top Impacting Factors: Market Scenario Analysis, Trends, Drivers and Impact Analysis

Education sector has seen a revolutionary change ever since the online medium of education services was made available. This not just eased the process of getting knowledge but also opened up opportunities for the market players to operate and innovate in the industry. From providing online assistance to the school education to offering courses accepted throughout the educational institutions and corporates, the market is keen to serve the consumer base and provide satisfactory utility.

The global online education services market trends are as follows:

New medium of education to flourish the market

Online education services that was earlier seen as a substitute to the conventional education has now emerged as an all new medium of imparting education. With the increase in number of students in academic institutions, there prevails a need to upskill the teachers and staff and provide them with the relevant training. This simply adds up to the cost of education that is ultimately transferred to the students.

Online learning has enabled this cost reduction and enhanced efficiency in learning. Many educational institutes make specific courses compulsory to make the students understand the concepts well. Many educational service providers are opting for face to face learning and this has made the learning more participative and interactive.

Global recognition of online courses

Since the online courses offered are very informative, convenient, and highly competent in comparison to the offline and time taking courses offered by the institutes, these have a wider acceptability. As such most of the educational institutions approve and promote MOOC i.e. Massive Open Online Courses. In fact, many higher education institutions are making certain MOOC courses compulsory for the students to get domain specific knowledge.

The growing reliability of the customers over these courses are enabling the courses to get validation from various institutions and this is boosting the market growth. .
