## Some Key Highlights From the Report

- Black tea segment accounted for the largest revenue share in 2020, owing to its major health benefits such as presence of antioxidants that help to block DNA damage associated with exposure to tobacco or other toxic chemicals. These antioxidants are different from those obtained from fruits and vegetables, and as a regular part of the daily diet, these can provide additional benefits for a healthy living. Black tea has antimicrobial properties that can kill harmful microbes and improve intestinal bacteria and immunity.
- Oolong tea segment is expected to expand at a faster revenue growth rate over the forecast period. It is a Chinese traditional herbal tea that is partially fermented and semi-oxidized. It differs from green tea and black tea in terms of antioxidant content such as thearubigins, theaflavins, and EGCG. Consuming oolong tea provides various health benefits such as improving metabolism, lowering cholesterol levels, and helping to lose weight.
- Flavored tea segment is expected to register a rapid growth rate in terms of revenue over the forecast period. Flavored tea is gaining special attention in modern times, due to its enhanced flavor. Shifting trend from traditional tea to flavored tea is another driver boosting demand for flavored organic tea. This type of tea is available in the forms of oolong, mint, chamomile, cinnamon, and others. It contains plenty of vitamin C which helps to maintain blood sugar and cholesterol levels, manage weight loss, and boosts a person's immunity.
- Supermarkets or hypermarkets segment revenue is expected to expand significantly over the forecast period. This channel offers a large variety of goods in one place, provides great discount on bulk purchase, and give seasonal offers to attract many customers towards product purchase.
- North America accounted for significant market revenue share in 2020 because of growing consumption of organic tea in the United States and constant launch of new flavors by prominent players. Consumers are becoming more conscious about the safety of healthy food. The trend of consuming effective organic beverages in the United States and Canada also drives market revenue growth in this region.
