Monolith Technologies, Inc. Unveils ShopSavvy Shopping Assistant for 2024

Innovative Agentic Technology Provides Instant Issue Research Across the Web, Deal Grading and Alternative Product and Retailer Recommendations

DALLAS, TEXAS, UNITED STATES, December 6, 2024 /EINPresswire.com/ -- Monolith Technologies, Inc., a pioneer in consumer technology innovation, is proud to announce the release of the ShopSavvy Shopping Assistant for 2024. This new foundational architecture redefines how consumers shop by leveraging advanced agentic technology to deliver unmatched personalization, instant product research all while getting the consumer the best product at the best possible deal.

ShopSavvy Shopping Assistant is designed to streamline the shopping experience by real-time searching for the best deals, evaluating their merit, and providing tailored product recommendations based on each user's unique preferences. This revolutionary product aims to empower consumers with all the information they need to make informed purchasing decisions effortlessly.

"We've introduced agentic technology throughout the architecture from top to bottom," stated Jake Marsh, Chief Technology Officer at Monolith Technologies. "ShopSavvy Assistant searches for the best deals in real time, evaluates and grades the deal for the user, and makes product recommendations based on that user's specific preferences. This ensures our users are always getting the best possible options tailored just for them."

The new Shopping Assistant raises the bar on user interactivity and product information accessibility. Shoppers can now track and prioritize the product features and issues most important to them with ease, facilitating a more personalized and fulfilling shopping journey.

John S. Boyd, CEO and Co-Founder of Monolith Technologies, shared his enthusiasm: "ShopSavvy Assistant allows shoppers to track issues that are important to them. With one click, they can see

🤖 **YOUR SHOPPING ASSISTANT**
Ask questions, and get answers about products, prices, and more!

You: *Is this blender easy to clean?*

ShopSavvy:
Yes, the Vitamix 5200 is designed to be easy to clean. You can simply blend warm water and a drop of dish soap at the machine's highest speed, and it will self clean in around 60 seconds. No disassembly is required.

You: *Is now a good time to buy? Anything else I should know before buying?*

ShopSavvy:
You can likely save **20-30%** when they go sale. According to our data, this happens (on average) **every 3 months**. The next sale is expected sometime in the **next 2-4 weeks**.

Overall, it's a great choice, but many reviewers say that its just **too loud**.

You should check out the **Wolf Gourmet Pro**, it's a little cheaper than the 5200 (around $100 less). Multiple reviewers say it's the quietest blender they've tried:

Wolf Gourmet WGBL200S Pro-Performance High Speed Blender, 64...

ShopSavvy Assistant Instantly shows what consumers and reviewers are saying about any issue

how products perform in terms of features important to them and suggest alternatives. This has been a pioneering feature for shoppers and we couldn't be more excited about where consumer product search is headed"

Monolith Technologies is set to roll out the ShopSavvy Shopping Assistant across all major platforms, ensuring that consumers everywhere can benefit from enhanced shopping efficiency and personalized insights. This release marks a significant milestone in Monolith Technologies' mission to bring cutting-edge solutions to everyday shopping challenges.
