

# a-tune Announces Major Update to tick@lab Research Compliance and Animal Research Facility Software

---

*The latest version of a-tune's tick@lab software marks a major milestone in the platform's evolution and features a wide range of significant upgrades.*

AUSTIN, TEXAS, UNITED STATES, November 23, 2021 /EINPresswire.com/ -- Germany- and Texas-based [a-tune](#), a provider of data management software and applications for lab research and compliance, has released the latest version of its tick@lab software. This release marks a major milestone in the platform's evolution and features a wide range of significant upgrades, including:

- Enhancements for recording and managing animal health records
- New functionality for improved "in-front-of-the-cage" mobile use
- Enriched action task features
- New gene database for independent management of genes and alleles
- Streamlined Species/Strains data model for better management of extensive strains portfolios

a-tune's CEO, Andreas Staubi, noted, "While this tick@lab release brings valuable technical advances, it will above all significantly improve how organizations handle master data." Staubi also pointed to other improvement points the release brings: simplified setup and maintenance as well as new paths for further functionality extensions. As with all tick@lab releases, existing customers will receive the new features free of charge.

Interested individuals can now [schedule a guided demo](#) of the latest tick@lab release. Additional information regarding a-tune's data management solutions and the tick@lab software platform can also be found at [www.a-tune.com](http://www.a-tune.com).
