EINPresswire.com/ -- According to the latest report by IMARC Group, titled "[Genitourinary Drugs Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026](#)," the global genitourinary drugs market is expected to grow at a CAGR of around 4% during 2021-2026.

Genitourinary Drugs Market

Genitourinary drugs are medicines that aid in treating the conditions of the excretory system, reproductive organs, urinary tract, etc. They are also used in the treatment of bladder spasms, erectile dysfunction in men, and suppressing uterine contractions to prevent preterm labor in women. Genitourinary infections can be sexually transmitted or spread via several pathogens, including parasites, bacteria, and viruses. Genitourinary drugs include impotence agents, tocolytic agents, urinary antispasmodics, urinary pH modifiers, uterotonic agents, etc. They are utilized in the event of iatrogenic injuries, congenital abnormalities, cancer, trauma, hydronephrosis, inflammation, etc.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Global Genitourinary Drugs Market Trends:

The escalating prevalence of genitourinary diseases is one of the key factors driving the genitourinary drugs market. Apart from this, the increasing usage of these drugs in treating urinary tract infections and chronic kidney failures among pediatric patients is further catalyzing the market growth. Moreover, the introduction of medications that assist in treating chronic

prostate cancer in patients who have developed resistance to conventional chemotherapeutic and hormone therapy agents is acting as another significant growth-inducing factor. Besides this, the elevating number of pipeline drugs in late-stage clinical trials is also stimulating the global market. Additionally, the rising investments by biopharmaceutical companies in research and development (R&D) projects aimed at the study of next-generation therapeutics are anticipated to fuel the genitourinary drugs market over the forecasted period.
