

Logistics Automation Market 2026: Expeditious Growth Expected In Coming Years

Gaining traction due digital transformation in the logistics industry, emergence of IoT, exponential growth in the eCommerce industry, advancements in robotics.

PORTLAND, PORTLAND, OR, UNITED STATE, November 24, 2021

/EINPresswire.com/ -- Logistics automation decreases manual entry of processing freight shipments with automatic retrieval of options in the procurement of transportation with automatic notifications and real time updates of freight information. This is a major factor that drives the adoption of logistics automation across various industry verticals and boosts the global [logistics automation market](#) growth.

Key benefits of logistics automation include preference for transportation mode of choice and real time freight rates, access to real time freight data and analysis, accurate commodity freight classification which in turn reduces costly manual errors, and many others.
