Bioprocess Containers  
Market by Type (2D  
Bioprocess Containers, 3D  
Bioprocess Containers, Tank  
Liners, and Others),  
Application (Process  
Development, Upstream,  
and Downstream)”

*Allied Market Research*

The global bioprocess containers market is expected to witness significant growth during the forecast period, due to the factors such as increase in demand for biologics and rise in production of vaccines using single-use disposable technology. In addition, affordability and sustainability of single-use bioprocess technology are the other key factors that are responsible for the growth of bioprocess containers market. Moreover, lower risk of cross-contamination boosts the growth of this market. However, high issues associated with leachable and extractable bioprocess containers, implementation of stringent regulatory policies toward manufacturing practice of

bioprocess containers and high cost of instruments pose a major obstacle for the growth of the

market. On the contrary, launch of new drugs in the market is anticipated to provide lucrative opportunities during the forecast period.
