To take care of the infected population, the demand for medical supplies is increasing. Respiratory support devices such as atomizer, life-support machine, oxygen generator, and monitor are among the majorly used medical devices in primary clinical treatment. Moreover, COVID-19 has led to a huge surge in demand for medical supplies such as personal protective equipment including masks, gloves, and protective eyeglasses. With a rise in the number of COVID-19 cases worldwide, the need for medical supplies keeps on rising among, both from healthcare professionals and civil populations for precautionary measures. Manufacturers of these products have a chance to capitalize on this increased demand for medical supplies to ensure adequate and continuous supply of personal protective equipment in the cardiology information system (CIS) market.

Owing to such factors, COVID 19 is expected to have a significant impact on the cardiology information system market.
