As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the purchase behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Market Trends:

The global market is primarily driven by the widespread integration of advanced electronics with military equipment. The increasing usage of unmanned ariel vehicles (UAVs) and the rising need for efficient surveillance systems across the defense sector have contributed to the market growth. Furthermore, the growing incidences of terrorist attacks and security breaches across

the globe have strengthened the need for effective security measures. This, coupled with the rising utilization of the digital battlefield, has propelled the demand for electronic warfare on the global level. Moreover, the increasing number of cybersecurity threats has also catalyzed the adoption of advanced surveillance systems equipped with cloud and artificial intelligence (AI). Apart from this, rising government spending on radar and air defense systems and the escalating preference for military robots have further created a positive outlook for the market.
