

High-efficiency Particulate Air (HEPA) Filtration Air Purifiers to Capture Highest Market Value

Air Purifier Market is expected to register a CAGR of 10% during the forecast period, 2021-2031.

ROCKVILLE, MARYLAND, UNITED STATES, November 25, 2021

/EINPresswire.com/ -- Award-winning consulting firm Fact.MR's report on the global air purifier market forecasts a healthy outlook, expecting almost threefold growth to surpass US\$ 20 billion by 2031. Anticipated CAGR for the market is a whopping 10%, majorly underpinned by increasing need for indoor and outdoor air purification mechanisms to improve air quality.

Consumers are increasingly leaning towards high efficiency particulate air (HEPA) purifiers, amid its ability to filter out 99.9% pathogens. Simultaneously, preference for activate carbon filter mounted and UV technology air purifiers is also experiencing a major incline. Drastically altering climatic conditions have resulted in heightened PM 2.5 levels and other pollutants, which has significantly deteriorated air quality, providing a significant nudge to the aforementioned air purifier categories.

The latest research report published by Fact.MR on the Survey of Air Purifier Market is intended to offer reliable data on various key factors shaping the growth curve & outlook of Air Purifier market.
