- 2) The prolonged lockdown resulted in a disrupted supply chain and increased the prices of raw materials.
- 3) However, as the world has been recovering from the pandemic, the market is estimated to get back on track.

Pharmaceutical and biotech companies along with governments around the globe are working to address the COVID-19 outbreak from supporting the development of vaccines to planning for medicine supply chain challenges. Currently, around 115 vaccine candidates and 155 molecules are in the R&D pipeline. Moreover, commonly used drugs such as Hydroxychloroquine have witnessed surge in demand for the management of COVID-19. Such high demand for these drugs has presented huge opportunity for manufacturers of COVID-19 management drugs, as many developed countries are short of these drugs.
