Forecast, 2019–2027". The report provides a detailed analysis of changing market dynamics, top segments, value chain, key investment pockets, regional scenario, and competitive landscape.

Foot and mouth disease (FMD) is a severe, extremely contagious viral disease of livestock that has a significant economic impact. It affects swine, cattle, sheep, goats, and other cloven-hoofed ruminants. Intensively reared animals are more liable to the disease than traditional breeds. It causes high mortality in young animals due to myocarditis or when infected by the disease or even lack of milk. FMD causes fever and blister-like sores on the tongue and lips, in the mouth, on the teats, and also between the hooves. The disease leads to severe production losses, and while the majority of affected animals recover, the disease often leaves them weakened and debilitated. The
