that their typing competitions are the most cheat-free and toughest on the Internet. All of the keystroke data is preserved in their fully analysed BSBL Infinite Keystroke Database and this is the first check that is made. The second check is that all winners are contacted personally and in an online conference call they are required to carry out a verification check of their fast typing skills.

The competitions are different from other online typing tests and typing racer games because bsbltyping.com believe that typing without accuracy is pointless and so they make accuracy a deciding factor as to who wins the competition, with the proviso that at the highest level they accept a tiny percentage (1.5%) of keystroke errors so that competitors can still concentrate on high speed typing and still win a competition or a ranking in a typing test.
