

Algae Biofuel Market Size Worth USD 11.35 Billion by 2027 – Reports and Data

Growing demand of Algae Biofuel as alternative to different biofuels including Bioethanol, along with increased application in fuel will boost market growth

NEW YORK, NY, UNITED STATES,
November 28, 2021 /

EINPresswire.com/ -- The global [Algae Biofuel market](#) is forecasted to reach

USD 11.35 Billion by 2027 at a CAGR of 8.8%, according to a new report by Reports and Data. The ever-rising demand for fuel in different end-use enterprises, combined with the rising requirement for green and feasible wellsprings of vitality, is a key supporting for the fast advancement of the green growth biofuel showcase.

Green growth biofuel has developed as progressively encouraging in meeting the worldwide needs of powers in the low-carbon economy. Fast walks made by the transportation business in different pieces of the world have conferred powerful development force to the green growth biofuel showcase. A few activities by governments as of late in a few nations over the world have concentrated on the selection of sustainable power sources. The expanding interest for ease fills for the flight division is additionally a great pattern in the green growth biofuel advertise.

The COVID-19 impact:

COVID-19 has impacted the market negatively. The weaker consumer demand for lifestyle and well-being products due to the imposition of lockdown and social restrictions will have a negative impact on the demand for fuel and transportation. The COVID-19 pandemic has crippled various industries, along with public construction. The activity will more likely cease due to the imposition of lockdown and social distancing, and work will halt due to the supply chain disruption, the termination of contracts to control expenses, and the shortage of subcontractors and materials. However, the ease in restrictions and the government initiatives to start the economic activities in the consumer goods market creates hope for the imminent recovery of the market.

Reports And Data

Key participants include Algenol, Blue Marble Production, Sapphire Energy, Solazyme Inc., Culture Biosystem, Origin Oils, Genifuels, Algae system, Solix Biofuels, Reliance life Science, among others.

Further key findings from the report suggest

- Algae changed over into different kinds of powers, contingent upon the procedure and the piece of the cells utilized. The lipid or slick piece of the green growth biomass can be extricated and changed over into biodiesel through a procedure like that utilized for some other vegetable oil, or changed over in a processing plant into "drop-in" substitutes for oil-based fills. On the other hand or following lipid extraction, the starch substance of green growth can be aged into bioethanol or butanol fuel
- Algal oil is utilized as a wellspring of unsaturated fat supplementation in food items, as it contains mono-and polyunsaturated fats, specifically EPA and DHA. Its DHA content is generally equal to that of salmon based fish oil
- The growing interest in biofuels because of its lower carbon impression over the globe is relied upon to drive income development of the worldwide Algae oil showcase over the figure time frame.
- Be that as it may, parameters required for the development of green growth, for example, stickiness and temperature, are central points expected to limit income development of the green growth oil showcase over the estimated time frame.
- The players operating in the market have undertaken several strategies related to the market; for instance, in February 2020, Reliance Life Sciences disclosed that the company would be spearheading several algae-based projects, including turning organic waste into kerosene and aviation fuel. Reliance is also using advances in gene editing to improve the production capacity of algae significantly.

For the purpose of this report, Reports and Data have segmented into the global Algae Biofuel market on the basis of extraction type, form, application, end-use industry, and region:

Extraction Type Outlook (Revenue, USD Million; Volume, Million Gallons; 2017-2027)

- Hexane Solvent Method
- Lipid Extraction Method
- Supercritical Fuels Method
- Others

Form Outlook (Revenue, USD Million; Volume, Million Gallons; 2017-2027)

- Solid
- Liquid
- Gaseous

Application Outlook (Revenue, USD Million; Volume, Million Gallons; 2017-2027)

- Vehicular Fuel
- Energy Generation
- Heat Generation
- Cleaning Agent
- Others

End-Use Industry (Revenue, USD Million; Volume, Million Gallons; 2017-2027)

- Automotive & Transportation
- Aerospace & Defense
- Others

Regional Analysis Covers:

North America (U.S.A., Canada, Mexico)

Europe (U.K., Italy, Germany, France, Rest of Europe)

Asia Pacific (India, Japan, China, South Korea, Australia, Rest of APAC)

Latin America (Chile, Brazil, Argentina, Rest of Latin America)

Middle East & Africa (Saudi Arabia, U.A.E., South Africa, Rest of MEA)

About Us:

Reports and Data is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target and analyze consumer behavior shifts across demographics, across industries and help client's make a smarter business decision. We offer market intelligence studies ensuring relevant and fact-based research across a multiple industries including Healthcare, Technology, Chemicals, Power and Energy. We consistently update our research offerings to ensure our clients are aware about the latest trends existent in the market.
