

How does 'ATR' help in Methanol Industry Growth?

*The Business Research Company's
Methanol Market - Opportunities And
Strategies – Global Forecast To 2022*

LONDON, GREATER LONDON , UK,
November 26, 2021 /

EINPresswire.com/ -- Large-scale plants
using natural gas as feedstock are
increasingly using [auto thermal](#)

[reforming](#) (ATR) for production of methanol. In this process, instead of a tubular reformer, an ATR is used which significantly reduces steam addition to freestreams. Methanol is being blended into gasoline and is being used in vehicles to improve safety, reliability, fuel economy and lower environmental impact.

The [methanol market](#) is expected to grow at a CAGR of around 12% to nearly \$19 billion by 2022. Growth in the methanol market in the historic period resulted from low natural gas prices, developing economies, increased demand for vehicles, and low interest environment. Factor that negatively affected growth in the historic period was safety concerns. Going forward, economic growth and increasing end use applications of methanol will drive growth.
