

# Lifestyle Changes End Up Driving Demand For The Ambulance Services Market

*The Business Research Company's  
Ambulance Services Global Market Report  
2021 - COVID-19 Implications And Growth*

LONDON, GREATER LONDON, UK,  
November 26, 2021 /

EINPresswire.com/ -- Changes in lifestyles and an increase in sedentary jobs are transforming the disease profile of the world population demanding for ambulance services. Around 292,000 adult in-hospital cardiac arrests occur each year.

Change in lifestyle increase the incidence of cardiac arrests and thereby drive the demand for ambulance services.

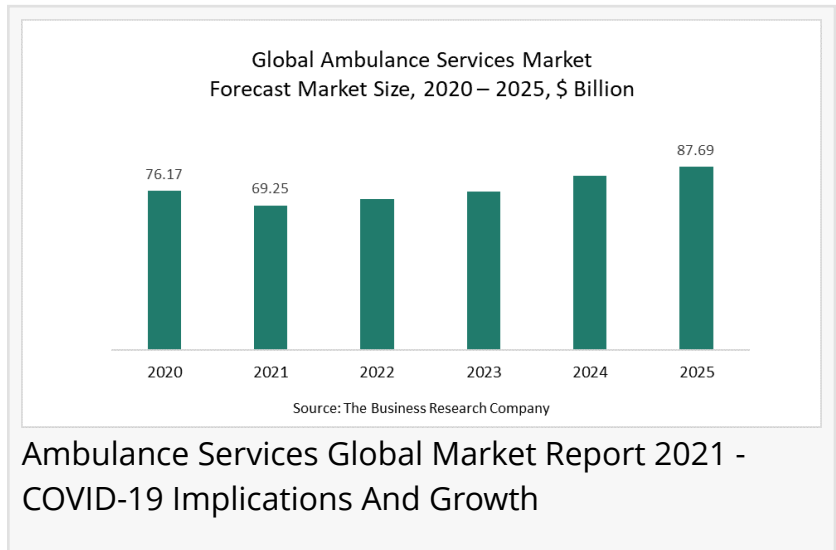

Digitalization of information related to patients including their medical history, diagnoses, medications, treatment plans, immunization dates, allergies, radiology images, and laboratory and test results is being made possible with Electronic Health Records (EHRs). EHRs increase patient participation, and improve diagnostic and treatment outcomes.

TBRC's holiday sale has begun with discounts on ALL market research reports! [Grab your deal now.](#)

The global [ambulance services market](#) size is expected to decline from \$76.17 billion in 2020 to \$69.25 billion in 2021 at a compound annual growth rate (CAGR) of -9.1%. The change in growth trend is mainly due to the companies stabilizing their output after catering to the demand that grew exponentially during the COVID-19 pandemic in 2020. The ambulance services market is expected to reach \$87.69 billion in 2025 at a CAGR of 6%.
