

Digital Interventions Are A Recent Trend In The Residential Substance Abuse And Mental Health Facilities Market

The Business Research Company's Residential Substance Abuse And Mental Health Facilities Global Market Report 2021 - COVID-19 Impact And Recovery

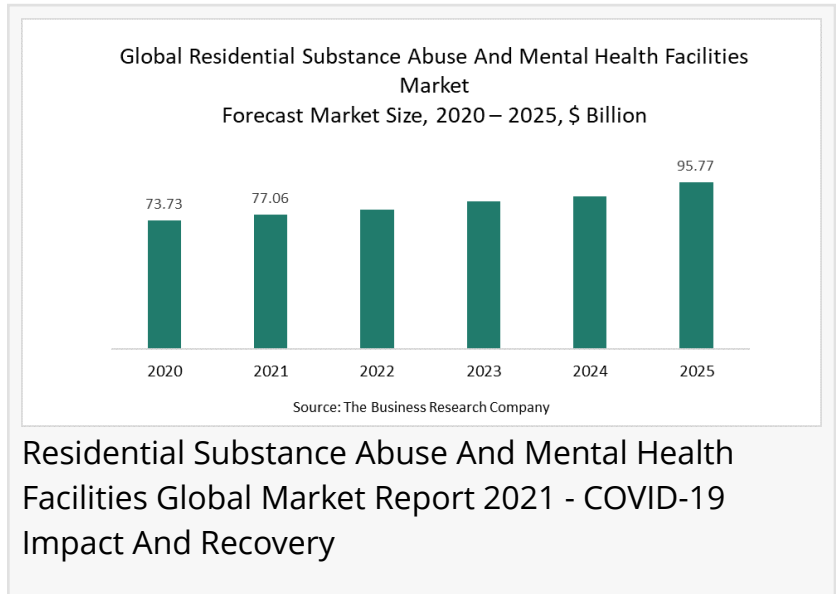

LONDON, GREATER LONDON, UK,
November 26, 2021 /

EINPresswire.com/ -- Medical service providers are using technology-based interventions to aid in the treatment of substance abuse patients. Technology is used to deliver interventions via digital platform with an intention to treat substance use disorders by

providing emotional, decisional or behavioral support for physical and mental health problems. These technology-based interventions include internet technology mediated therapy, web-based self-help interventions and virtual therapeutic software. Also, self-guided and web-based education interventions are enabling people to access information about specific symptoms, diagnosis of condition effect on patient health and treatments, provide communication between a therapist and patient through the internet. For instance, major hospitals offering technology-based interventions for substance abuse disorders include Mayo Clinic, Texas Medical Center, Johns Hopkins, The London Clinic, American Hospital and Fortis Memorial Research Institute.

Autism and Attention Deficit and Hyperactivity Disorder (ADHD) cases are increasing in most parts of the world. ADHD is defined by impaired functioning in the areas of attention, hyperactivity, and impulsivity and autism is a neurodevelopmental disorder characterized by impaired social interaction, verbal and non-verbal communication, and restricted and repetitive behavior. According a report by Australian Autism ADHD foundation, one in every 20 children across the USA is expected to be diagnosed with ASD by 2020. Increasing incidences of mental issues is expected to drive this market growth going forward.

North America was the largest region in the global [residential substance abuse and mental health facilities market](#), accounting for 63% of the market in 2020. Western Europe was the second largest region, accounting for 19% of the global residential substance abuse and mental health facilities market. Africa was the smallest region in the global residential substance abuse and mental health facilities market.
