Rise in health concerns for high-protein flour provides impetus for product innovation in alternatives such as rice flour, maize flour, corn flour, and soya flour. Owing to the urbanization and modern lifestyle, the demand for flour-based foods has boomed the market. Expansion of commercial farmlands and growth of aquatic feed industry in Asia-Pacific have raised the application of flour in animal husbandry. Growth in the global population and rise in per capita income are two major drivers of the market. Furthermore, increase in average selling price of flour in most of the countries has positively impacted the growth in the market.

The bread & bakery products segment occupied approximately two-fifths of the overall flour

market revenue, and is anticipated to maintain its dominance throughout the forecast period. This is due to increase in use of a diverse variety of flours in the production of bread and other bakery products as well as rise in trend of adoption of on-the-go food habits, especially among youngsters worldwide.

Europe accounted for the largest share in the market, owing to increase in inclination of consumers towards bread & bakery products. Asia-Pacific is further expected to account for the second largest share, attributed to growth in population as well as rise in trend among youngsters following western food habits and food products. It is expected to register a significant growth rate over the forecast period.

Key findings of the study:

- Wet technology segment is anticipated to grow at the fastest rate during the analysis period.
- Asia-Pacific is estimated to continue to lead the market, growing at a CAGR of 4.9%, in terms of revenue.
- Noodles & pasta occupied for more than two-ninths of the total share of the global flour market.
- Non-food application is estimated to grow at the highest CAGR of 6.5%, in terms of revenue.
- Others segment is expected to show a significant growth in the Asia-Pacific region.
