[X-ray Market](#)-[X-ray Market](#) scenario analysis:

Technological progress, cost containment, and increased access will in the near future be an integral part of healthcare reforms. Digital health and telehealth have taken a front seat in the ongoing outbreak. COVID-19 re-emphasized the importance of remote diagnosis, care, and consultation. Over the past few years, regulatory and behavioral barriers have slowed Telehealth growth. However, since many healthcare providers are currently working on video conferencing

and telephone calls, this segment's growth will increase several folds over the next two years. The social distancing measures also mandated online consultation of patients with moderate symptoms. In addition, it greatly reduces the burden on hospitals already swamped by counts of COVID-19 patients. Medical IoT devices that live at home with patients are now being used for optimizing outpatient treatment and minimizing repeat visits, and these devices can be further used in a crisis situation.
