that features several instructional videos on hearing aid cleaning and care. AHA also offers a free hearing evaluation that has assisted countless clients in obtaining free hearing aids if qualified through insurance or other support.

Dr. Griffith understands how crucial treatment of hearing loss is to a patient's overall physical, mental, and emotional health. “Treatment of hearing loss has been shown to

improve communication in relationships, sense of control over your life, social participation, and emotional stability,” he said. The benefits of hearing aids increase the enjoyability of life's moments and improve your engagement with people and your surroundings. Hearing aids enable you to better contribute to the workplace, increase your productivity, and allow room for greater improvements in personal and professional relationships.

Accessible Hearing Aid's website has a free hearing screening available for all ages to get patients started on their journey to better hearing. “It's recommended that you have your hearing checked at least once a year, especially if you are over the age of 40,” Dr. Griffith said. AHA offers a free hearing evaluation that not only diagnoses problems and determines the best avenue for treatment but also guides patients trying to qualify for their hearing aids to be paid through

Accessible Hearing Aids

Bringing Hearing to your Home

Hearing aids are specifically adjusted and programmed to the individual needs of each patient.

private insurance, Medicare, Medicaid, vocational rehab, national and state foundations, and the Veterans Health Administration. AHA also guarantees the most up-to-date advances in hearing aid technology, such as programmable processors fine-tuned for each user. Hearing aids can be adjusted for noise and wind reduction, wireless connectivity to phones and other mobile devices, or compatibility with doorbells and smoke alarms.

If your evaluation reveals that you could benefit from hearing aids, AHA provides you with live speech mapping and real-ear measures during your hearing aid fitting. Real-ear measures tune amplification based on your personal needs. Custom earmolds ensure that patients who play music, hunt, swim, and frequently use Bluetooth to make phone calls have the best protection possible. AHA supplies batteries in small packets or bulk boxes, which means your new hearing aids will always be charged and ready to go. Before the end of your fitting appointment, you will receive information on how to clean hearing aids, replace batteries, filters, and domes, and how to program Bluetooth/FM compatible accessories. Accessible Hearing Aid's team is always available to reassess this information with you for as long as you use hearing aids. Most of this information is publicly available in the form of highly educational videos on AHA's YouTube channel.

Dr. Joe Griffith began a private practice in audiology in 2015, intending to make hearing treatment easily available by offering house calls and in-house visits to patients' offices or living communities. He received his Doctorate in Audiology from Auburn University and is affiliated with the American Speech-Language and Hearing Association and the Louisiana Academy of

A promotional graphic for Accessible Hearing Aids. It features a dark blue background with a large, stylized eye graphic in the upper right. The text is white and yellow. At the top, the website URL is listed. Below that, a large question asks if the viewer is eligible for free hearing aids. A short paragraph explains the organization's goal. At the bottom, a yellow button contains the text 'Learn More at' followed by the website URL.
