The Global Virtual Private Network (VPN) Market was valued at \$27.1 Billion in 2020. Growing at a high CAGR of more than 14.3% between 2021 and 2031

KOLKATA, WEST BENGAL, INDIA,
November 28, 2021 /

EINPresswire.com/ -- According to a new market research report published by sheer analytics and insights, "The Global [Virtual Private Network \(VPN\) Market](#)

was valued at \$27.1 Billion in 2020. Growing at a high CAGR of more than 14.3% between 2021 and 2031, it is estimated to reach \$130.3 Billion by 2031, as per the latest market research report titled, Global Virtual Private Network (VPN) Market - Industry analysis, size, share, growth, trends, and forecast, 2031-2031.

The VPN or Virtual Private Network (VPN) enhances the organizations' productivity. The data is encapsulated into network protocols through a secure passage, reducing and minimizing the chances of cyber-attacks and data breaches. It allows sharing data with a particular subset of stakeholders by helping in business continuity and reliability. Apart from that, in some cases, VPN utilizes more time because it secures the data, which takes time due to network traffic sometimes. This is another reason which can restraint the market can be complexities in the network. In addition to this, the growing concerns over the security of the data being transferred over a public internet connection are expected to propel the market growth during the forecast period.
