Global Meat Market Trends:

The global meat market is primarily driven by the increasing demand for protein-rich and low-fat food. Besides this, the growing consciousness regarding health has also encouraged individuals to opt for meat and meat products in their daily diet. Nowadays, several cafes and restaurants across the globe are serving meat-based burgers, hotdogs, sausages, fillets and steaks, which is fueling the market growth. In addition to this, technological advancements, such as the utilization of robotics and automation technology, in the butchering, cutting, and monitoring processes enhance production efficiency and minimize cycle time. On account of these factors,

the market is expected to witness positive growth in the upcoming years.
