

VREF Business Aircraft and General Aviation Aircraft Market Update 4th Quarter 2021

VREF Aircraft Value Reference, Appraisal, & Litigation Services Market Update for Business Aircraft and General Aviation Aircraft.

BUFFALO GROVE , IL, USA, November 29, 2021 /EINPresswire.com/ -- During the 3rd quarter, VREF subscribers generated on average 20,000 valuation reports every 30 days. This is up over 7% from the previous quarter.

The market supply is tight across the board, although some of the market activity has led to more aircraft availability in certain markets. The later model SR22's, as well as Cessna 182 (all variants) and Piper Cherokee 180's, has ticked up in inventory availability, but values continue to drive higher. For most of the top lists, VREF has adjusted the values from 5% to 15% in the last quarter. The small and medium business jet markets have remained active, and a steady stream of transactions continues to be reported across all popular models. The larger business jets have done remarkably well this past quarter, with demand increasing month over month. Many of the same messages from last quarter hold today; however, it is worth mentioning that many service centers are reporting extreme waiting periods and, in some cases, quoting well into 2022 for availability. Be careful about trying to schedule pre-buys and always schedule maintenance as far out as possible as supply chains are still strained.

“

we are forecasting high residual values for the foreseeable future, as general aviation has been immune to the pandemic thus far.”

VREF is cautiously optimistic about the next quarter and early 2022, as many transactions will carry into the new year. We will keep an eye on lockdowns, quarantines, and the global markets as they are tested in the near future.

With thousands of aircraft appraisals under our belt every year, our team of Accredited Senior Appraisers (ASA) helps you make an intelligent and informed decision. Our data-backed appraisals are at the core of our entire business. We continue to help aviation professionals, banks, and financial institutions with accurate, unbiased data.

Of course, there are other programs and businesses out there that provide aviation appraisals. However, we've perfected our craft with 27 years of producing aircraft appraisals our clients can rely on. There's no need to feel uncertain or apprehensive about an appraiser you're trusting to complete your appraisal. We aim to serve our customers by completing appraisals with the utmost level of professionalism.
