

Nebulizers Market Growth, Drivers, Trends, Major Players, And Market Segments

*The Business Research Company's
Nebulizers Market – Opportunities And
Strategies – Global Forecast To 2030*

LONDON, GREATER LONDON, UK, November 30, 2021 / EINPresswire.com/ -- The [global nebulizers market](#) is expected to slow down to \$1.04 billion in 2021, when compared to \$1.67 billion in 2020, owing to a demand decrease, as the pandemic situation stabilizes. Wastage and loss of medication through nebulizers is a common issue which patients experience and this factor is expected to hinder the market during the forecast period.

However, global nebulizers market is expected to grow at a compound annual growth rate (CAGR) of 10.9% during 2019-2023 to nearly \$1.26 billion by 2023. Also, the market is expected to grow to \$2.61 billion in 2030 at a CAGR of 10.9%. An increased acceptance of mesh nebulizers is expected to boost the nebulizers market during the forecast period as it continues to establish a place for itself coupled with other driving factors such as demand for newer technology, higher quality, lighter, and more reliable devices.

The nebulizer devices market consists of sales of nebulizers by entities (organizations, sole traders and partnerships) that produce nebulizers used in respiratory care for patients with respiratory diseases including asthma, cystic fibrosis and COPD. A nebulizer is a drug delivery device that changes medication from a liquid to a mist form (fine droplets or aerosols) for direct inhalation into the lungs. The components that make up a nebulizer include air filters, tubing, and compressor to deliver medication to the user in a vaporized form.

The nebulizers market is segmented into pneumatic nebulizer, mesh nebulizer, ultrasonic nebulizer, asthma, COPD, cystic fibrosis, others, 5 years, 5 to 14 years, 15-69 years, 70+ years, tabletop, portable, hospitals and clinics, emergency centers, home healthcare.

Major players covered in the global nebulizers industry are Koninklijke Philips N.V., Omron Corporation, Aerogen, PARI, Drive Medical.

Nebulizer manufacturers are increasingly investing in smart nebulizers which can be used by adults as well as children. Smart or intelligent nebulizers are app enabled and connected to smartphones. Users of these types of nebulizers can adjust the nebulization rate, they can choose the most suitable atomization strength according to their own demand or doctor's advice. Moreover, nebulizer manufacturing companies are increasingly investing in portable and easy to use nebulizers to provide effective and fast medication delivery with reduced treatment time. Easy to use nebulizers are being manufactured with built-in, rechargeable batteries.

Nebulizers Market - Opportunities And Strategies – Global Forecast To 2030 is one of a series of new reports from The Business Research Company that provides nebulizers market overview, forecast nebulizers market size and growth for the whole market, nebulizers market segments, and geographies, nebulizers market trends, nebulizers market drivers, restraints, leading competitors' revenues, profiles, and market shares.
