PORTLAND, UNITED STATES, November
30, 2021 /EINPresswire.com/ --

According to the report by Allied
Market Research, titled, "[Airway
Management Devices Market](#) By Type

(Infraglottic Airway Management Devices, Tracheostomy Tubes, Endotracheal Tubes, Oropharyngeal Airways, Laryngeal Mask Airways, Nasopharyngeal Airways, Resuscitators, Laryngoscopes, Video Laryngoscopes, Others), and Patient Age (Pediatric Patients/Neonates, Adult Patients): Global Opportunity Analysis and Industry Forecast, 2020–2026". The report

provides a detailed analysis of changing market dynamics, top segments, value chain, key investment pockets, regional scenario, and competitive landscape.

“

Airway Management
Devices Market By Type
(Infraglottic Airway
Management Devices,
Tracheostomy Tubes,
Oropharyngeal Airways,
Laryngeal Mask Airways,
Nasopharyngeal Airways,
Resuscitators)”

Allied Market Research

Airway management comprises a set of operations and medical procedures accomplished to prevent and also help in relieving airway obstruction. This ensures an open pathway for gas exchange between a patient's lungs and the atmosphere. This can be achieved by preventing airway obstruction in cases such as anaphylaxis, the obtunded patient, or medical sedation or by clearing a previously obstructed airway. Airway blockage can be caused by foreign objects, tongue, the tissues of the airway itself, and

bodily fluids such as blood and gastric contents.

The COVID-19 is the pandemic which causes respiratory problems and the spread of this can only be stopped with the help of social distancing. The infected population requires medical supplies and the increase in demand of the medical devices for management of the disease is growing drastically. Respiratory support devices such as life-support machine, oxygen generator, atomizer, and monitor are among the majorly used medical equipment in primary clinical treatment. Furthermore, COVID-19 has led to a huge outpouring in demand for medical supplies such as the personal protective equipment including gloves, masks, and protective eyeglasses. With rise in number of COVID-19 cases throughout, the demand for medical supplies keeps on mounting among, both from healthcare professionals and civil population for precautionary measures.

□□□ □□□□□□□□□□ □□□□□□□□:

The rise in the number of launch of new products that are designed such that they could fulfill the need of the market would help the market gain maximum revenue. For instance, in September 2018, Royal Philips announced that it had developed a resuscitation device by getting in collaboration with the Consortium for Affordable Medical Technologies (CAMTech) to help decrease neonatal mortality. The product is named as Augmented Infant Resuscitator (AIR). This device could be used as an add-on product with standard neonatal bag-valve-mask (BVM) resuscitators generally used by caregivers to resuscitate majorly asphyxiated newborn babies.
