Covid-19 Scenario:

1) The Covid-19 pandemic and followed by lockdown has affected several manufacturing industries.

- 2) The prolonged lockdown resulted in a disrupted supply chain and increased the prices of raw materials.
- 3) However, as the world has been recovering from the pandemic, the market is estimated to get back on track.

COVID-19 is an infectious disease that originated in Hubei province of the Wuhan city in China in late December. The highly contagious disease, caused by a virus, severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), is transmitted from human to human. Since the outbreak in December 2019, the disease has spread to almost 213 countries around the globe with the World Health Organization declaring it a public health emergency on March 11, 2020.

#### Top Impacting Factors

- 1) Rise in prevalence of sexually transmitted diseases, rise in usage of herpes treatment, increase in awareness regarding sexually transmitted diseases, increase in usage of targeted herpes treatment procedures, surge in hospital acquired infections, and increase in demand for effective therapeutic treatment are the key factors that drive the growth of the market.
- 2) However, lack of diagnostic tests and social stigma associated with treatment hinder the growth of the market.
- 3) Contrarily, government support for regulatory approvals and awareness campaigns regarding sexual transmitted diseases are expected to offer lucrative opportunities for the expansion of the market.
