Covid-19 Scenario:

- 1) The Covid-19 pandemic and followed by lockdown has affected several manufacturing industries.
- 2) The prolonged lockdown resulted in a disrupted supply chain and increased the prices of raw materials.
- 3) However, as the world has been recovering from the pandemic, the market is estimated to get back on track.

Pharmaceutical and biotech companies together with governments around the globe are working to address the COVID-19 outbreak, from supporting the development of vaccines to planning for medicine supply chain challenges. Currently, around 115 vaccine candidates and 155 molecules are in the R&D pipeline. Moreover, commonly used drugs such as Hydroxychloroquine have witnessed a dramatic surge in demand for the management of COVID-19. Such high demand for these drugs has presented huge opportunities for manufacturers of COVID-19 management drugs, as many developed countries are facing shortage of these drugs. Thus, the pharmaceutical and biotechnology industry is expected to witness a significant growth in the future owing to the demand for vaccine and treatment drugs for COVID-19. This in turn is expected to have a significant impact on the fibromyalgia treatment market.

Top Impacting Factors

- 1) Increase in cases of road accidents, rise in demand for effective fibromyalgia treatment & procedures, rise in number of fibromyalgia cases, surge in patients suffering from psychotic disorders & post-traumatic stress, and surge in geriatric population are the key factors that drive the growth of market.
- 2) However, side effects related to use of drugs hinder the growth of market.
- 3) Contrarily, growth opportunities in emerging markets and rise in patient suffering from stress are expected to offer lucrative opportunities for the expansion of the market.
