The <u>global radiotherapy market</u> was valued at \$4,723million in 2016 and is projected to reach \$7,222million by 2023, growing at a CAGR of 6.2% from 2017 to 2023. The external beam radiation therapy segment accounted for more than four-fifths of the total market in 2016. The market is driven by growth in number of cancer patients, increase in geriatric population, rise in adoption of radiotherapy devices and procedures, owing to surge in number of awareness campaigns about the benefits of radiotherapy, and technological advancements in radiotherapy devices. However, dearth of skilled personnel and difficulty in tumor visualization restrict the market growth.
