American-born artist and photographer Howard Harris has long been interested in dimensional photographs, how we perceive them, and the world's transient, ever-shifting visual experience. Harris composes photography by juxtaposing and mixing different shots to create vibrant, bold, and eye-catching images that confound the eye. In addition, Harris exhibits natural landscapes, animals, and figures to give them a new dimension and force us to see them from a different perspective, making us reflect on the relation between perception and technology and think about the way we perceive "art" and "beauty."

“

A photo should capture more than one moment in time, one view, and one experience.”

Arttour International Magazine announced its participation at Spectrum Miami Art Fair with a display of an exclusive selection of contemporary artists from around the world and a projection of the Arttour International TV Shows and Digital Exhibition at Booth #503.

In the words of ATIM CEO, Viviana Puello "The best thing about attending art fairs is meeting artists in person and feeling their passion for art! Everyone needs an escape from their daily routines- In today's busy world, it has become increasingly difficult to slow down and take a break from your typical routine. Art plays an important role in reflection and contemplating your next move to live's important decisions.

That's why ArtTour International was created: to help support and grow art culture around the globe by providing Artists with better exposure and opportunities that otherwise would be impossible to obtain alone. Art will always remain an essential component in our lives as it allows us to see beyond just what we see with our eyes; there are many worlds within one work of art!" said Puello. We're excited to bring Howard Harris to our booth. "Concluded Puello.
