Construction and Demolition Waste Recycling Market Competitive Analysis:

These players have implemented various strategies such as expansions, mergers & acquisitions, joint ventures, new product launches, and collaborations to strengthen their position in the industry.

During lockdown, owing to COVID-19, the construction & demolition waste generation was hampered. The recycling facilities were also partially or completely closed due to the lockdown.
This has affected the recycling of the waste material that was already in the facility and due to very limited construction activities during the lockdown, the waste generated at construction sites is also reduced. However, introduction of vaccines for COVID-19 and reopening of production facilities gradually are anticipated to lead to re-initiation of waste management companies and construction & demolition waste recycling industry at their full-scale capacities.
