Development of the hospitality industry is anticipated to drive Europe 900 series cooking equipment market growth. Moreover, rise in business related travel, surge in urban population, and increase in number of food joints such as hotels and restaurants fuel the growth of the hospitality industry, thereby driving the growth of the market. Moreover, changes in trends of food consumption and growth in need to reduce food wastage have led to the development of innovative kitchen equipment. These factors altogether are anticipated to drive market growth during Europe 900 series cooking equipment market forecast period.

Continuous developments in food industry and favorable government regulations to promote the production of eco-friendly and advanced equipment are expected to open new avenues for the cooking equipment manufacturers. However, volatile prices of raw materials and higher installation cost of equipment is anticipated to limit their adoption. A key market trend that is

anticipated to gain traction in Europe 900 series cooking equipment market is the growth in demand for certified equipment.

Based on product type, Europe 900 series cooking equipment market is segmented into ambient worktops, base unit ovens, boiling kettles, bratt pans, fryers, griddles, hobs, pasta cookers, and others. Base unit ovens is expected to dominate the other equipment generating highest revenue in 2017. By end use, the market is categorized into full-service restaurants, institutional canteen, hotel & resorts, quick service restaurants, and others. Full-service restaurants ensures premium quality food with unique combination and full-table service. In addition, high level of disposable income results in dining out with entertainment options. These factors drive the growth of the full-service restaurants and thus held the maximum share in 2017.
