

# Defibrillators Market Strategic Analysis to Understand the Competitive Outlook of the Industry, 2028

---

*The ability of the defibrillator device to diagnose early onset of ventricular tachycardia and ventricular defibrillation is expected to promote its demand.*

PORTLAND, OREGON, UNITED STATES, December 2, 2021 /EINPresswire.com/ -- According to the report by Allied Market Research, titled, "[Defibrillators Market](#) by Product (T-ICDs, S-ICDs, CRT-D, MED, AED, WCD) and End-User (Hospitals, Prehospital, Public Access, Alternate Care, Home) - Global Opportunity Analysis and Industry Forecasts, 2021 - 2028". The report provides a detailed analysis of changing market dynamics, top segments, value chain, key investment pockets, regional scenario, and competitive landscape.

Advent of automated external defibrillators (AEDs) for public access places, rising incidences of sudden cardiac arrest, and growing awareness towards public access defibrillators worldwide are the factors majorly driving the market growth. The rising number of application areas for defibrillators, coupled with increasing adoption of defibrillator systems (both ICDs and external defibrillators) in cardiology, is expected to boost the world defibrillators market growth. Cost-effectiveness, safety, high accessibility, and clinical value in preliminary treatment of sudden cardiac arrest strengthen the technological advancements in this market. In addition, increase in number of advanced implantable cardiac defibrillators (S-ICDs, T-ICDs, and CRT-D) and awareness about early treatment of life threatening cardiac diseases (such as cardiac arrhythmia, ventricular fibrillation, and sudden cardiac arrest) are anticipated to further drive the demand for defibrillators globally. However, unawareness, unfavorable healthcare reforms, certain issues related to (external and implantable) defibrillators are the limitations that restrict the market growth.
