According to the latest report by IMARC Group, The global chlorine compressors market exhibited negative growth in 2020.

SHERIDAN, WYOMING, UNITED STATE, December 3, 2021 /EINPresswire.com/ -- According to the latest report by IMARC Group, The global [chlorine compressors market](#) exhibited negative growth in 2020. Looking forward, IMARC Group expects the market to grow at a CAGR of 3.5% during 2021-2026.

Chlorine compressors refer to the equipment that forms a key component in chlorine production plants. They are generally used to regulate pressure during the production process while ensuring optimal flow rate in a controlled manner. They are utilized to compress liquid or solid forms of chlorine that are further used in the manufacturing of synthetic rubber, paper and pulp, solvents, pesticides, and refrigerants. Some of the commonly available product variants include reciprocating, centrifugal and liquid ring chlorine compressors.

Market Trends:

The global market is primarily driven by significant growth in the chemical and petrochemical industries. Along with this, the widespread utilization of chlorine compressors across the manufacturing sector is creating a positive outlook for the market across the globe. Moreover, the rising adoption of compressors to produce chlorine-based derivatives, including poly aluminum chloride, sodium hypochlorite and bleaching powder, is also positively influencing the market growth. Some of the other factors contributing to the market growth include rapid industrialization, the increasing usage of chlorine in water treatment solutions and extensive research and development (R&D) activities conducted by key players.
