Increase in population and rise in urbanization drive the market growth globally. Consumers are being more conscious for their looks and purchase beauty products, which are best suitable for them from their price to their convenience of usage. Electric shaver is a grooming product daily used by men to remove their facial hairs

generally and frequently used by women to remove hair from different body parts like hands, legs, or underarms. It is very easy to use and prevents skin from any kind of irritation and cuts, which can be caused by the direct use of blades.

New products that contain improved capabilities have been launched by leading market players. They have taken necessary steps to improve accuracy of devices and overall functionality as well.

An electric shaver has now come with better features and skin comfort with the absence of shaving irritation and precisely shaves around edges such as the sideburns, no remaining hair after shave, and smoothness after shave.

COVID-19 Scenario Analysis::

All business and production activities are fully shut down except the necessary one such as food and medical sector or other, leading toward economic crisis in the country. Manufacturing and production functions are stopped, which has slowed down the business and inactive trade and transportation has fully disrupted the supply chain because of which companies can face big losses in near future.
