

# MillionaireMatch's Survey Reveals 25 Percent of Its Female Members Are Single and Looking for Love

LOS ANGELES, CALIFORNIA, US, December 6, 2021 /EINPresswire.com/ -- MillionaireMatch, an online elite club especially for rich and attractive singles looking for love, has revealed the results of a recent survey of its female members. When asked about their current marital status, nearly 25 percent of the women registered to use the site in the last six months said they were single, meaning 1 in 4 is ready to date or is seeking a relationship right now.

Over 41 percent of the respondents chose not to indicate their relationship status on their profile, and nearly 22 percent invited interested parties to ask them directly. This suggests a further 63 percent of MillionaireMatch's female members are potentially available for a serious relationship but chose not to specify their marital status on their profile perhaps because privacy is important to them.

"Once you have achieved a certain level of success, it can be harder than ever to find someone who is interested in you for who you are and not what you have," explained a spokesperson for MillionaireMatch. "It can be a real challenge to meet your special soul mate or find someone who is interested in a lasting relationship, even though you are ready to meet someone. So it's perfectly understandable that our members may want to maintain a degree of privacy when they create their profiles and choose who can view them and what they see. And that's absolutely fine! MillionaireMatch is here to help all our members find the relationship that's right for them."

The survey shows a further 12.03 percent of MillionaireMatch's female members are separated, divorced, widowed, or never married, so they, too, are waiting to hear from that special someone as soon as possible. With over 5 million exclusive members, they're sure to find a quality match on MillionaireMatch and stand a good chance of meeting the right life partner for them. And, since members benefit from live support, email support, and dating counselors when they join, they are more likely to avoid issues when looking for, finding, and dating a potential love match.
