The global Blockchain Technology Market will be worth USD 111.58 Billion by 2027, according to a current analysis by Emergen Research. The growth of this market can be attributed to the rising adoption of blockchain technology in supply chain management. Blockchain technology help in the flow of information through multiple nodes, and it also helps in back-tracking the origin of the products. The blockchain technology can efficiently handle the tracking of the raw materials and enhance the transparency of the supply system. The increased transparency of the supply chain provides more visibility to both consumers and businesses and reduces fraud for high-value goods such as pharmaceutical drugs and diamonds.
