

# Filament Tapes Market exhibiting a CAGR of 7.1% during the forecast period (2020-2027) | 3M Company, Tesa Tape Inc.

SEATTLE, WA, UNITED STATES, December 6, 2021 /EINPresswire.com/ -- The [filament tapes market](#) is set to reach at the highest levels in Asia Pacific, owing to high demand in emerging economies such as India and China, as well as lower manufacturing costs in these countries. Low production costs in developed countries are a result of quick access to raw materials and low labor costs. Similarly, the North America and Europe region are poised to rise at a faster rate in the filament tapes market owing to the well-established industrialized sector.

Wrap film tape, duct tape, and blue tapes are some of the alternative names for filament tapes. This tape can be used to package a wide range of items, including boxed lunch boxes, paper products, and cartons, to mention a few. Filament tape, also known as strapping film, is a high-quality pressure-sensitive adhesive tape used for filling corrugated plastic packages, strengthening big packages, bundling supplies, pallets, and other unitizing applications. This tape's sticky backing allows it to stick to a variety of materials, including wood, metal, and cardboard. Filament tapes come in a wide range of colours to suit the packaging needs of a wide range of product brands and applications.

The filament tapes market is primarily driven by the growth of the automotive and electrical industries. Factors such as ease of usage, multi-functionality, tensile strength, simple removability without leaving traces, and others drive the filament tapes business.

Furthermore, filament tapes are more refined than glue closures or twines, which may lure customers who would otherwise buy these things to filament tapes, allowing the filament tapes industry to grow. Duraco Specialty Tapes, a prominent tapes manufacturer, purchased Filmquest Group in March 2021 to expand its product range in the flexible packaging market.

Despite the fact that filament tapes are generally quite efficient for massive packing, they are also one of the most expensive tapes, which could be a stumbling obstacle to the filament tapes market's rise. Aside from that, with a little power, the filament can be cut lengthwise, and recent technological advancements in production, as well as increased competition from alternative tapes, can both act as barriers in the filament tapes market.
