

# Cain Manzira's New Release "A Scientific Proof: Souls' Existence Plausible" Proves Experimentally That Human Souls Exist

*"A Scientific Proof: Souls' Existence Plausible" from ChristianFaith Publishing, author Cain Manzira gives an argument for the verifiable existence souls.*

BEAUFORT, SC, USA, December 6, 2021 /EINPresswire.com/ -- ["A Scientific Proof: Souls' Existence Plausible"](#): a powerful dissertation that explores faith and

the soul. "A Scientific Proof: Souls' Existence Plausible" is the creation of published author [Cain Manzira](#), a native of Zimbabwe and current resident of South Carolina who has transitioned from being a computer engineer to a nuclear scientist in the last five years. He is currently finalizing a PhD in nuclear engineering.

Manzira shares, "Proving that an invisible microsphere can carry intelligible data equivalent to that of the average human brain gives plausibility to the idea that human

beings have souls.

"This proof was achieved through a scientific experiment that quantified the number of electromagnetic particles in a 1.73nm diameter sphere.

"With that premise, the book traces the author's life going from childhood to current with a bearing of the influence and participation of religious activities. It takes the reader into the mind-set of a doubter who questioned belief in Christianity and used [scientific reasoning to accept Christianity](#).

"It then takes the reader through the explanations inferred from the existence of souls on the actions they take in life phenomenon where such actions are normally attributed to spiritual effect or miraculous occurrences. Arguments are forwarded to dispel other researcher's opinions about the so-called evidence against the existence of a human soul."

Published by Christian Faith Publishing, Cain Manzira's new book argues in defense of the

existence of the human soul.

Manzira shares a personal look at faith and a scientific exploration of the spiritual spark that makes one who they are.
