We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report

The sudden outbreak of the COVID-19 pandemic is leading to several economic and business challenges, which is encouraging various enterprises to digitize key business processes using the cloud. This is among the key factors driving the cloud migration services market to boost the speed, performance, security, etc., of cloud adoption and transformation. Moreover, numerous educational institutions are relying on cloud computing for the purposes of remote education, which is further catalyzing the market growth. Besides this, the rising number of health firms that are employing cloud solutions to meet the privacy, security, and compliance needs of [healthcare](#) practices, owing to the escalating volumes of medical data, is acting as another significant growth-inducing factor. Furthermore, the elevating demand for these solutions in the banking, financial services and insurance (BFSI) industry to migrate hardware data and provide technologically aided services securely is anticipated to propel the cloud migration services market over the forecasted period.

Competitive Landscape:
