

Dental Compressor Market Huge Growth in Future Scope 2021-2028 | Kaeser Dental, Ritter Dental USA, Mestra

SEATTLE , WASHINGTON, UNITED STATES, December 7, 2021
/EINPresswire.com/ -- [Dental Compressor](#) Market

Overview:

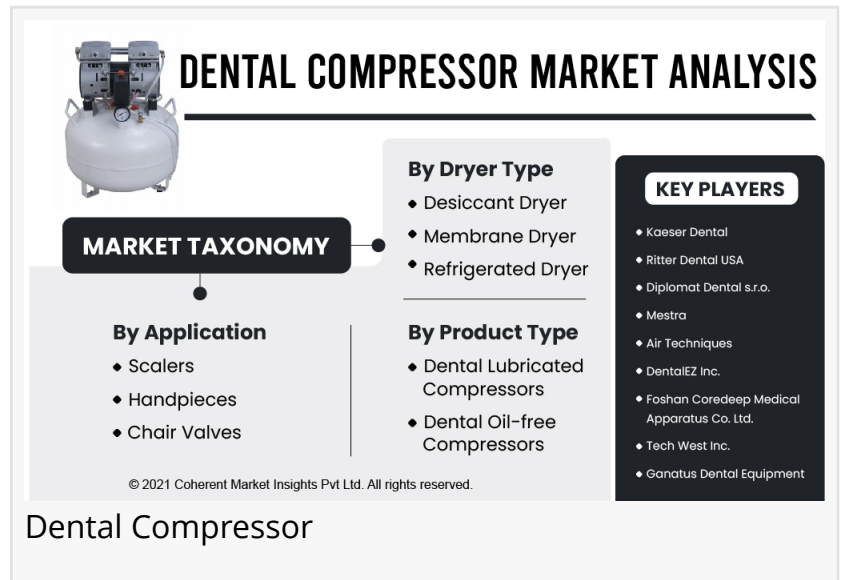

Dental compressors are used for pressurizing atmospheric air in many dental procedures. The quality of inlet air and air inside compressor decides the quality of compressed air. In order to reduce the moisture, most dental compressors use a dryer. Dental compressors' heads come with one or more pistons designed for eliminating heat, hence a good quality material is required to build these compressor heads. Antifriction coatings such as Teflon are used on pistons to make is more durable.

Drivers:

Moreover, factors such as increasing cases of gum diseases and oral health problems due to unhealthy habits such as smoking and chewing tobacco, as well as increasing geriatric population are expected to boost growth of the global dental compressor market. For instance, in 2015, the Centers for Disease Control and Prevention reported 90% of population aging 20 and above experience cavities and gum disease affected 4 to 6% of adults in the U.S.

Moreover, increasing use of devices such as dental lubricated compressors in developing countries due to its qualities such as high durability and low maintenance is expected to propel growth of the global dental compressor market.

Growing awareness among people across the world regarding oral health and its importance is also expected to fuel growth of the global dental compressor market.

Market taxonomy:

By Dryer Type;

Desiccant Dryer

Membrane Dryer

Refrigerated Dryer

By Product Type;

Dental Lubricated Compressors

Dental Oil-free Compressors

By Application;

Scalers

Handpieces

Chair Valves
