The global projector screen market has been analyzed based on historical, current, and future trends in the countries across the global region. Increasing adoption of digital technologies in developed as well as developing nations is the key factor propelling the market growth. Projector screens are continuously supporting virtual operations, analysis, and communication of businesses; thus, it has major adoption ratio in offices of each industry. There is an immense growth in the projector market; hence, each country would witness the launch of more enhanced projector screens technology offering high quality projection and advanced portable projectors.

As residential customers are identifying the potential of projector screen, the market players are focused to develop short distance projection screen technologies. The COVID-19 further supplemented the market growth in residential sector as customers are demanding large screens to experience cinema and other shows at home. Besides, growing demand from commercial segment, such as restaurants, sport bars, and shopping malls is pressurizing projector screen manufacturers to improve offering suitable for particular location. Companies operating in the market adopt various marketing strategies, such as new product developments, partnerships, and acquisitions, to optimize their existing offerings and expand their portfolio to target a significant number of customers.

Impact of COVID-19 Pandemic on Projector Screen Market

Due to COVID-19 pandemic, several business organizations have been pushed to reduce their operations owing to lockdowns announced by several governments worldwide. Though the impacts on diverse businesses are well-known, the technology sector is also facing the largest disruption in recent remembrance. The lockdown announced by various governments across the globe resulted in temporary shutdown of offices, schools, cinema halls, manufacturing plants, and venues. This had negatively impacted the projector screen market. However, as people are maintaining social distancing by staying at homes, the demand for projector screens by the personal segment is witnessing growth.

Growing Demand for Cinema Projector Screens in Developing Nations Fuels Market Growth

The projector screens are getting more demand from the developing nations owing to low-cost and growing digitalization. Companies, schools, governments, and other sectors are transforming their operation into digital platform and adapting new digital technologies such as projectors smartphones, tablets and other advanced systems. Increasing digitalization in developing nations creates opportunity for the market players to introduce their products into media and entertainment, corporate, and education sectors. The increasing number of movie theaters in developing nations such as China and India create opportunity for new projector

screen installations.

For instance, in July, 2019, IMAX China and South Korean cinema chain CGV formed partnership to roll out 40 new theatres across China. The cinemas are built using IMAX's new laser projector technology for brighter and sharper resolution. Similarly, in December 2018, PVR, an Indian cinema company announced the installation of 150 screens using Barco cinema projectors in India. Such growing cinema industry in developing nation is driving the growth of the market.
