Surge in popularity of sports, increase in disposable income, changes in lifestyle, rapid urbanization, and focus on fitness & healthy life style fuel the growth of the sports graphics market. In addition, proactiveness of government to promote sports and contribution of the private sectors, such as clubs and franchisees, in organizing numerous tournaments have significantly led to development of the sports industry, offering notably lucrative opportunity to its supplementary industries. Moreover, technological advancements have significantly influenced fans to adopt athleisure fashion trends.

The Indian business environment has witnessed a dynamic change with 360 degree developments initiated by the government, private sector, and the non-profit entities. Significant growth in spectator of sports other than cricket has been reported in the recent times. In addition, increase in sponsorship, and broadcast and participation in sports significantly supports the rise in demand for sports graphics in India.

The screen printing market in the U.S. generated the maximum revenue in 2016. Screen printing employees a cylindrical screen that rotates from a fixed position to print designs onto the fabric. The demand for screen printing has significantly decreased with course of time. However, development of smart fabrics that has significant demand as sport & fitness wear is projected to foster the growth of the screen printing market in the U.S.

Moreover, the screen printing market in India accounted for the maximum share over digital printing, embroidery, and other services. This is attributable to advantages such as high production speed, high productivity, and availability of rotary screen printing machines in various sizes. These machines enable fast changeover of patterns, including very less design limitation, and are generally lightweight in nature, leading to their high preference over other textile printing machines. These machines are generally cost-effective and mostly used for bulk production of textiles.
