

# Computer Keyboard Market predicted to experience noticeable growth in the future

*Computer Keyboard Market Global Opportunity Analysis and Industry Forecast, 2021–2030*

POTLAND, 5933 NE WIN SIVERS DRIVE, #205, OR 97220, UNITED STATE, December 9, 2021 /EINPresswire.com/ -- The [computer keyboard market](#) is experiencing significant growth due to surge in demand for computer hardware as individuals are working remotely to tackle the operational challenge caused by COVID-19. It is expected to considerably grow in the next few years as many corporate individuals will shift toward remote working. It is an input device that is used to enter functions and characters into a personal computer, laptop, tablet, phones, and smart television (TV). Swiss-American company Logitech International, SA, is ramping up offerings to meet the new demand offered by individuals, and is focusing on the production of wireless peripherals to fulfill the market need as soon as possible. Keyboards are mainly of three types wired keyboard, wireless keyboard, and ergonomic keyboard. Convenience for employees is a crucial factor for a good working environment. The keyboard companies are introducing ergonomic keyboards designed to reduce muscle stress. These keyboards are comfortable and convenient for usage. The application of a computer keyboard is in personal, corporate, gaming, and others. Its end users are E-learning institute, household, corporate institutions and others. It is considered cheap and highly productive computer peripherals that can improve efficiency.

## Companies Covered

Logitech International, SA, Razer Inc, HP Inc, Microsoft Corporation, Dell technologies Inc, Corsair Component Inc, Rapoo Corporation, OMRON Corporation, Cherry GmbH, and Roccat GmbH.

## COVID-19 Impact Analysis

COVID-19 had restricted outdoor movement and forced users to maintain social distance and work remotely to tackle the operational barrier. It has led to a surge in demand for computer hardware and peripheral to run the clerical work properly. Computer peripheral companies were focusing on the bulk production of keyboards. However, supply chain of distribution was disrupted due to COVID-19 that impacted the sale and market demand. COVID-19 has caused an operational challenge to the corporate, which is forcing the individuals to work long on keyboards to achieve their targets, resulting in increasing musculoskeletal disorder (MSDs) and repetitive strain injuries (RSIs). This has created a demand for using ergonomic keyboards.

## Top Impacting Factors

The low price with high-quality products in the market are encouraging intense competition between companies that can lead to the market growth.

Increased awareness for strain or stress in muscles had led to an increased usage of ergonomic keyboards. Certain types of ergonomic keyboards have a non-standard layout, which generally confuses the user and decreases efficiency.

Ergonomic keyboards with standard layouts are beneficial for employees as they increase productivity and maintain comfort for working. The increase in capitalization on marketing activities by the manufacturers to promote ergonomic keyboards is expected to offer a huge opportunity to expand their business in the market.

The importance of convenience is a crucial factor for working, which has led to a demand for wireless ergonomic keyboards. The wireless keyboard with an ergonomic layout will give total comfort to the user without any muscle stress.

Healthy typing habits initiated by the management of a company can discourage the usage of ergonomic keyboards and instead adapt perfect posture while typing.

## Market Trends

### New product launches

The launch of newly developed products is needed due to the increased need for peripheral to tackle the operational challenges and the importance of convenience. As new products with enhanced features can generate demand and regulate the growth of the market. Compact size, anti-ghosting keys, membrane keys, fast entry, and lightweight are the features that can increase optimal efficiency and can be advantageous for usage. A new upgraded version of a wireless ergonomic keyboard can be advertised or promoted to generate self-awareness, which is expected to increase the sale over the coming years.

### The emergence of the e-sports industry

The demand for upgraded and best hardware is increasing due to growth and popularity of the e-sports industry. The high standards of performance by the players are demanding better keyboards and unique features that will enhance the performance and lead to the best outcomes that the community expects from its players. The followers of the esports industry also want to use the same types of equipment used by their idols. This is expected to enforce the computer keyboards market companies to invest more in research and development to bring

out more efficient keyboards that can take gaming to the next level.

Additional features in wireless ergonomic keyboards

New features such as backlit and hotkey are attracting users. The backlit feature helps the individual work in low light condition and the hotkey is the pre-programmed feature or can be used to create shortcuts. These features can make an ergonomic keyboard attractive for usage and can drive up sales.
