

Early Bird Offer Ending in 1 Week for Maritime Reconnaissance and Surveillance Technology 2022

SMi Group reports: Book now and save £100 for Maritime Reconnaissance and Surveillance Technology Conference which is set to return in February 2022.

LONDON, NON UNITED STATES OR CANADA, UNITED KINGDOM, December 9, 2021 /EINPresswire.com/ -- With just 1 week to go until the early bird offer ends for SMi's Annual

[Maritime Reconnaissance and Surveillance Technology](#) conference,

taking place on 2nd to 3rd February 2022, London UK. The 2022 conference is set to focus on enhancing [maritime](#) domain awareness through developing and integrating innovative technologies.

Interested parties can register at <http://www.maritime-recon.com/PR4EIN> and take advantage of the early bird offer to save £100 which expires 17th December 2021.

Attendees who delegate attend the conference stand the chance:

- Keynote briefings from senior officers and military leaders from around the globe
- A unique focus on Unmanned ISR platforms, Space-based Maritime Reconnaissance, Fleet Air Arm ISR capabilities, Sensors at Sea and more
- Maritime equipment exhibition showcasing the latest technology
- Informal networking time factored in so you can gather insight from peers and colleagues also shaping and influencing maritime reconnaissance and surveillance systems today

View the agenda and conference brochure here: <http://www.maritime-recon.com/PR4EIN>

This year, with the geographical shift comes a subtle strategic one, providing a renewed focus on some of the strategic threats and technological challenges facing naval and joint forces from across the world. The conference retains an increased focus on space based maritime reconnaissance and the relation between the Littoral and Maritime Domains and ISR capabilities

that occur here.

The aim is to assist the advancement and engagement of Naval practitioners and Programme Managers through briefings, panel sessions and focused discussion groups on topics including Unmanned ISR platforms, Space-based Maritime Reconnaissance, Fleet Air Arm ISR capabilities, Sensors at Sea and more.
