

Display Panel Market Size, Demand, Growth Analysis, Share, Revenue and Forecast 2028

The primary factors that are driving the growth of this market are the rising demand for large-sized OLED panels for television and the demand for public

NEW YORK CITY, NY, UNITED STATES,
December 13, 2021 /

EINPresswire.com/ -- [Display Panel Market](#) is expected to grow from USD 57.13 billion in 2019 to USD 114.16

billion by 2028, at a CAGR of 5.60% from 2019 to 2026. Rising demand for large-sized OLED panels for television and the demand for public & commercial display panels are the factors driving the market.

Demand for OLED and quantum dot LCD displays and other emerging technologies such as micro-LED and true quantum dot are expected to boost the market for display panels' providers in the future.

Rising demand for flexible displays for smartphones and increasing expenditure on R&D are also driving the market. However, the decrease in Average Selling Price (ASP) and revenues due to overcapacity obstructs the growth of the market.
