The global managed DNS service market size is expected to reach USD 1,384.5 Million at a steady CAGR of 17.2% in 2028, according to latest analysis by Emergen Research. Steady market revenue growth can be attributed to increasing incidence of Distributed Denial Of Service (DDoS) attacks. A distributed denial of service gains from several security vulnerabilities in systems and directs large web traffic to a web-based application or website. Such attacks may cause servers to crash and make the web application or website unusable, thereby impacting customer service and leading to substantial revenue loss. Managed DNS providers offer several benefits such as improved security for large-scale attacks and failover DNS strategy, and improved performance, enabling smooth operation and performance of website/web app.
